Name : Arpit Rai || Class : MCADS11 || Roll No : 09 || Subject : NoSql and MongoDB

MongoDB Project

Write a Query for Each Question

1. Complex Filters & Projections

Q1. List the names and departments of students who have more than 85% attendance and are skilled in both "MongoDB" and "Python".

Answer1)

```
>_MONGOSH

> use PROJECTMONGO
< switched to db PROJECTMONGO
PROJECTMONGO> db.students.find(
                {
                  attendance: { $gt: 85 },
                  skills: { $all: ["MongoDB", "Python"] }
                },
                {
                  _id: 0,
                  name: 1,
                  department: 1
                }
              )// Name : Arpit Rai , Roll No : 09
```

Output :

No Output for the given query mean no data matched

Q2. Show all faculty who are teaching more than 2 courses. Display their names and the total number of courses they teach.

```
>_MONGOSH
> db.faculty.aggregate([
    {
      $project: {
        name: 1,
        totalCourses: { $size: "$courses" }
      }
    },
    {
      $match: {
        totalCourses: { $gt: 2 }
      }
    }
  ])// Name : Arpit Rai , Roll No : 09
```

Output :

```
< {
    _id: 'F029',
    name: 'Charles Newton',
    totalCourses: 3
  }
  {
    _id: 'F032',
    name: 'Julia Cole',
    totalCourses: 3
  }
  {
    _id: 'F040',
    name: 'Darrell Velasquez',
    totalCourses: 3
  }
  {
    _id: 'F048',
    name: 'Michael Poole',
    totalCourses: 3
  }
  {
    _id: 'F051',
    name: 'John Duran',
    totalCourses: 3
  }
  {
    _id: 'F061',
    name: 'Daniel Allen',
```

2. Joins ($lookup) and Aggregations

Q3. Write a query to show each student's name along with the course titles they are enrolled in (use $lookup between enrollments, students, and courses).

```
>_MONGOSH
> db.enrollments.aggregate([
    {
      $lookup: {
        from: "students",
        localField: "student_id",
        foreignField: "_id",
        as: "student"
      }
    },
    {
      $lookup: {
        from: "courses",
        localField: "course_id",
        foreignField: "_id",
        as: "course"
      }
    },
    {
      $unwind: "$student"
    },
    {
      $unwind: "$course"
    },
    {
      $project: {
        _id: 0,
        studentName: "$student.name",
        courseTitle: "$course.title"
      }
    }
  ])// Name : Arpit Rai , Roll No : 09
```

Output:

```
< {
    studentName: 'Alexandra Bailey',
    courseTitle: 'Reactive neutral adapter'
  }
  {
    studentName: 'Megan Taylor',
    courseTitle: 'Sharable bifurcated paradigm'
  }
  {
    studentName: 'Alejandro Hart',
    courseTitle: 'Focused user-facing paradigm'
  }
  {
    studentName: 'Timothy Sparks',
    courseTitle: 'Focused user-facing paradigm'
  }
  {
    studentName: 'Juan Morris',
    courseTitle: 'Balanced asynchronous framework'
  }
  {
    studentName: 'Donna Morgan',
    courseTitle: 'Organic optimal product'
  }
  {
    studentName: 'Patricia Scott',
    courseTitle: 'Fully-configurable responsive solution'
  }
  {
    studentName: 'Carolyn Chandler',
    courseTitle: 'Horizontal attitude-oriented knowledgebase'
```

Q4. For each course, display the course title, number of students enrolled, and average marks (use $group).

```
>_ mongosh: localhost:27017
>_MONGOSH
PROJECTMONGO > db.enrollments.aggregate([
                 {
                   $group: {
                     _id: "$course_id",
                     totalStudents: { $sum: 1 },
                     avgMarks: { $avg: "$marks" }
                   }
                 },
                 {
                   $lookup: {
                     from: "courses",
                     localField: "_id",
                     foreignField: "_id",
                     as: "course"
                   }
                 },
                 {
                   $unwind: "$course"
                 },
                 {
                   $project: {
                     _id: 0,
                     courseTitle: "$course.title",
                     totalStudents: 1,
                     avgMarks: { $round: ["$avgMarks", 2] }
                   }
                 }
               ]) // Name : Arpit Rai , Roll No: 09
```

Output:

```
< {
    totalStudents: 1,
    courseTitle: 'Fully-configurable empowering data-warehouse',
    avgMarks: 64
  }
  {
    totalStudents: 2,
    courseTitle: 'Balanced national function',
    avgMarks: 68
  }
  {
    totalStudents: 1,
    courseTitle: 'Focused multi-state encoding',
    avgMarks: 67
  }
  {
    totalStudents: 1,
    courseTitle: 'Switchable regional open system',
    avgMarks: 67
  }
  {
    totalStudents: 2,
    courseTitle: 'Streamlined bandwidth-monitored structure',
    avgMarks: 77.5
  }
  {
    totalStudents: 1,
    courseTitle: 'Triple-buffered eco-centric implementation',
    avgMarks: 97
  }
```

3. Grouping, Sorting, and Limiting

Q5. Find the top 3 students with the highest average marks across all enrolled courses.

```
>_MONGOSH
PROJECTMONGO> db.enrollments.aggregate([
                {
                  $group: {
                    _id: "$student_id",
                    avgMarks: { $avg: "$marks" }
                  }
                },
                {
                  $sort: { avgMarks: -1 }
                },
                {
                  $limit: 3
                },
                {
                  $lookup: {
                    from: "students",
                    localField: "_id",
                    foreignField: "_id",
                    as: "student"
                  }
                },
                {
                  $unwind: "$student"
                },
                {
                  $project: {
                    _id: 0,
                    studentName: "$student.name",
                    avgMarks: { $round: ["$avgMarks", 2] }
                  }
                }
```

```
      $project: {
        _id: 0,
        studentName: "$student.name",
        avgMarks: { $round: ["$avgMarks", 2] }
      }
    }
  ]) // Name : Arpit Rai , Roll No: 09
< {
    studentName: 'Diane Phillips',
    avgMarks: 100
```

Output:

```
< {
    studentName: 'Diane Phillips',
    avgMarks: 100
  }
  {
    studentName: 'Brandon Rios',
    avgMarks: 98
  }
  {
    studentName: 'Larry Ramsey',
    avgMarks: 94
  }
PROJECTMONGO> |
```

Q6. Count how many students are in each department. Display the department with the highest number of students.

```
>_MONGOSH
PROJECTMONGO> db.students.aggregate([
                {
                  $group: {
                    _id: "$department",
                    totalStudents: { $sum: 1 }
                  }
                },
                {
                  $sort: { totalStudents: -1 }
                },
                {
                  $limit: 1
                },
                {
                  $project: {
                    _id: 0,
                    department: "$_id",
                    totalStudents: 1
                  }
                }
              ])// Name : Arpit Rai , Roll No: 09
```

Output:

```
< {
    totalStudents: 23,
    department: 'Electrical'
  }
```

4. Update, Upsert, and Delete

Q7. Update attendance to 100% for all students who won any "Hackathon".

Input and Output:

```
>_MONGOSH
> db.students.updateMany(
    {
      _id: {
        $in: db.activities.distinct("student_id", {
          type: "Hackathon",
          position: "Winner"
        })
      }
    },
    {
      $set: { attendance: 100 }
    }
  )// Name : Arpit Rai, Roll No: 09
< {
    acknowledged: true,
    insertedId: null,
    matchedCount: 0,
    modifiedCount: 0,
    upsertedCount: 0
  }
```

Q8. Delete all student activity records where the activity year is before 2022.

Input and Output :

```
>_MONGOSH
> db.Activities.deleteMany({
    year: { $lt: 2022 }
  }) // Name : Arpit Rai , Roll No : 09
< {
    acknowledged: true,
    deletedCount: 0
  }
PROJECTMONGO >
```

Q9. Upsert a course record for "Data Structures" with ID "C150" and credits 4—if it doesn't exist, insert it; otherwise update its title to "Advanced Data Structures".

Input and Output:

```
>_MONGOSH

PROJECTMONGO> db.courses.updateOne(
                { _id: "C150" },
                {
                  $set: {
                    title: "Advanced Data Structures",
                    credits: 4
                  }
                },
                {
                  upsert: true
                }
              )// Name : Arpit Rai, Roll No: 09
```

5. Array & Operator Usage

Q10. Find all students who have "Python" as a skill but not "C++".

```
>_MONGOSH

> db.students.find({
    $and: [
      { skills: "Python" },
      { skills: { $nin: ["C++"] } }
    ]
  }) // Name : Arpit Rai, Roll No : 09
```

Output:

```
}) // Name: Arpit Rai, Roll No : 09
< {
    _id: 'S004',
    name: 'Kyle Hale',
    dob: '2000-10-20',
    department: 'Electrical',
    skills: [
      'Python',
      'Java'
    ],
    attendance: 79.78
  }
  {
    _id: 'S008',
    name: 'Cody Whitehead',
    dob: '2003-11-25',
    department: 'Biotechnology',
    skills: [
      'JavaScript',
      'Python'
    ],
    attendance: 92.03
  }
```

```

    attendance: 69.62
  }
PROJECTMONGO >
```

Q11. Return names of students who participated in "Seminar" and "Hackathon" both.

```
>_MONGOSH
> db.Activities.aggregate([
    {
      $group: {
        _id: "$student_id",
        types: { $addToSet: "$type" }
      }
    },
    {
      $match: {
        types: { $all: ["Seminar", "Hackathon"] }
      }
    },
    {
      $lookup: {
        from: "students",
        localField: "_id",
        foreignField: "_id",
        as: "student"
      }
    },
    {
      $unwind: "$student"
    },
    {
      $project: {
        _id: 0,
        studentName: "$student.name"
      }
    }
  ]) // Name : Arpit Rai, Roll No: 09
```

Output:

```
< {
    studentName: 'Lydia Day'
  }
  {
    studentName: 'Taylor Webb'
  }
  {
    studentName: 'Carlos Bryant'
  }
  {
    studentName: 'Patricia Scott'
  }
  {
    studentName: 'Adam Solomon'
  }
PROJECTMONGO >
```

6. Subdocuments and Nested Conditions

Q12. Find students who scored more than 80 in "Web Development" only if they belong to the "Computer Science" department.

```
>_ mongosh: localhost:27017

>_MONGOSH

PROJECTMONGO> db.enrollments.aggregate([
                {
                  $lookup: {
                    from: "students",
                    localField: "student_id",
                    foreignField: "_id",
                    as: "student"
                  }
                },
                {
                  $lookup: {
                    from: "courses",
                    localField: "course_id",
                    foreignField: "_id",
                    as: "course"
                  }
                },
                { $unwind: "$student" },
                { $unwind: "$course" },
                {
                  $match: {
                    "student.department": "Computer Science",
                    "course.title": "Web Development",
                    marks: { $gt: 80 }
                  }
                },
                {
                  $project: {
                    _id: 0,
                    studentName: "$student.name",
                    marks: 1
```

```
                },
                {
                  $project: {
                    _id: 0,
                    studentName: "$student.name",
                    marks: 1
                  }
                }
              ]) // Name : Arpit Rai, Roll No : 09
```

Output:

No Output

7. Advanced Aggregation (Challenge Level)

Q13. For each faculty member, list the names of all students enrolled in their courses along with average marks per student per faculty.

```
>_ mongosh: localhost:27017 +

>_MONGOSH

PROJECTMONGO> db.faculty.aggregate([
                {
                  $lookup: {
                    from: "courses",

Q14. Show the most popular activity type (e.g., Hackathon, Seminar, etc.) by number of student participants.

Input and Output:

```
>_MONGOSH
> db.Activities.aggregate([
    {
      $group: {
        _id: "$type",
        totalStudents: { $sum: 1 }
      }
    },
    {
      $sort: { totalStudents: -1 }
    },
    {
      $limit: 1
    },
    {
      $project: {
        _id: 0,
        activityType: "$_id",
        totalStudents: 1
      }
    }
  ])// Name : Arpit Rai , Roll No : 09
< {
    totalStudents: 35,
    activityType: 'Hackathon'
  }
